Was the *Aṣṭasāhasrikā Prajñāpāramitā* Compiled in Gandhāra in Gāndhārī?*

Seishi KARASHIMA

Prologue

Each Mahāyāna scripture must have its own complex background and history. Probably, many of the early ones were originally transmitted in Middle Indic or in a mixed language of Middle Indic with Sanskrit elements, and later “translated” gradually into (Buddhist) Sanskrit. This long cherished hypothesis has been proven by newly-discovered fragments of a Gāndhārī version of the *Aṣṭasāhasrikā Prajñāpāramitā* (Falk/Karashima 2012, 2013), dating back with an 81.1% probability, based on a C14 test, to between 47~147 C.E. Even the oldest Sanskrit Buddhist texts, representing the form in which we usually have access to them, are, in other words, the result of constant sanskritisation, wrong back-formations, reductions, additions and interpolations over the centuries. This means that when we attempt to understand early Mahāyāna scriptures properly so as to draw nearer to their original features or trace their transmission, if we restrict ourselves only to extant Sanskrit manuscripts, most of which date from the eleventh century onwards, the explanatory value of such studies is rather limited. In addition to Sanskrit texts, we should investigate all other available materials in order to flesh out this history. The Chinese translations, particularly those which were made between the second and the sixth century, which thus antedate most of the extant Sanskrit manuscripts, are indispensable sources as, in most cases, the exact periods of their translations are known. Apart from these Chinese translations, old Sanskrit and Gāndhārī fragments, discovered in Central Asia and “Greater Gandhāra” (present-day Pakistan, Afghanistan, Uzbekistan), Khotanese texts, Tibetan translations and so on, may provide substantial clues to tracing the origination, development and alternation of Buddhist scriptures. Especially the Gāndhārī manuscripts of Mahāyāna scriptures, dating even back to the first century, which have been discovered in recent years, may change our understanding of Mahāyāna Buddhism. In addition to written evidence, we should also pay attention to the results of research conducted on archaeological and art historical materials. By doing all this, we might be able to attain new perspectives on early Mahāyāna scriptures and hence, reconsider what we have understood through “eyeglasses” of common sense, by removing them and looking anew at primary materials. In this way, we may be able to draw nearer to the original features of early Mahāyāna scriptures.

* I am very grateful to Peter Lait and Kazuhiro Iguchi, who went to great trouble to check my English and to Mark Allon, Timothy Lenz and Jonathan Silk, who read through my draft and offered many useful suggestions.

(1) Gāndhārī manuscripts of the *Prajñāpāramitā*

In 1999, a collection of Buddhist manuscripts, written on birch bark in Kharoṣṭhī characters, was discovered in the ruins of a Buddhist monastery in the Bajaur area of the North-West Frontier Province of Pakistan, bordering Afghanistan. When found, these manuscripts were “in a deplorable state of preservation” and it took Prof. Nasim Khan two years merely to *unroll* the fragments (Nasim Khan 2008: 1). Since then, Prof. Khan together with his German colleague, Dr. Ingo Strauch, have been doing research on them and photographs and preliminary transliterations of nineteen fragments in this collection were published in 2008¹. However, although 13 years have passed since this sensational discovery, careful transliterations and comparative studies of one of the most important collections of Buddhist manuscripts have yet to be undertaken. These manuscripts, which are thought to date back to the first or second century based on palaeographical evidence, include fragments of the *Madhyamāgama*, the *Prātimokṣasūtra*, a Mahāyāna text (Nasim Khan 2008: 47~93), which refers to the three vehicles (*śravagayaṇa*, *praceabudhayaṇa*, *samasabudhayaṇa*) and *Akṣobha* (Skt. *Akṣobhya*) Buddha, a text which refers to *prañāparamida* (Skt. *prajñāpāramitā*) (*ibid.*, 113~119) and so on. Another collection, which is similarly thought to have come from northern Pakistan and is referred to as the "Split" collection, contains fragments of a second Gāndhārī Mahāyāna text. This is a Gāndhārī version of the *Aṣṭasāhasrikā Prajñāpāramitā* which has been dated back to between 47~147 C.E., and is therefore probably contemporary with the original text of the *Daoxing Banre jing* 道行般若經, the oldest Chinese translation of the *Aṣṭasāhasrikā Prajñāpāramitā*, translated by Lokakṣema in 179 C.E. With these newly-discovered fragments, we are now entering a new phase of research on early Mahāyāna scriptures and hence, we should make an exhaustive study of these, comparing them in particular with early Chinese translations.

In my *A Critical Edition of Lokakṣema's Translation of the Aṣṭasāhasrikā Prajñāpāramitā* (Krsh 2011), I compared word-for-word the oldest Chinese translation made by Lokakṣema in 179 C.E. (T. 8, no. 224) with the Sanskrit version, the Tibetan translation, the six other Chinese translations and a part of the Gāndhārī fragments of the same text. In this way, I attempted to trace additions, interpolations, deletions, reductions, changes and restructuring during the transmission of the *Aṣṭasāhasrikā Prajñāpāramitā*. In general, the older versions — namely the Gāndhārī fragments, the Chinese translations by Lokakṣema, by Zhi Qian 支謙 (fl. ca. 220~257 C.E.; T. 8, no. 225), by Zhu Fonian 竺佛念 (in 382 C.E.; T. 8, no. 226), by Kumārajīva (in 408 C.E.; T. 8, no. 227) and by Xuanzang 玄奘 (in 660~663 C.E.; T. 7, no. 220, pp. 865~920) — are simpler, while the newer ones — namely another translation by Xuanzang 玄奘 (in 660~663 C.E.; T. 7, no. 220, pp. 763~865), Shihu's translation (in 982~984?; T. 8, no. 228), the Sanskrit version and the Tibetan translation — are more detailed. It is quite remarkable that expressions concerning compassion — a notion in fact contradictory to emptiness (*śūnyatā*), the main theme of the *Prajñāpāramitā* scripture — are often wanting in the oldest versions, namely the first three Chinese translations,

¹ Nasim Khan 2008; cf. also the following site: <http://www.geschkult.fu-berlin.de/e/indologie/bajaur/content/index.html>

though later ones give a great deal of elaboration on this theme. On the contrary, the story of *Sadāprarudita* is given in great detail in the Chinese translations by Lokakṣema and Zhi Qian as compared with later versions. Also, as we shall see below, the theme of the story seems to have changed as it moved from the oldest to the later versions. As I have demonstrated elsewhere recently², the Chinese translations by Zhi Qian and Zhu Fonian are none other than “modified versions” of Lokakṣema’s oldest translation, which is basically word-for-word, very literal and rudimentary. Zhi Qian merely “sinicised” it, while Zhu Fonian basically copied Lokakṣema’s translation, only replacing old-fashioned, vernacular words and expressions within it. Therefore, in order to clarify the original features of *Prajñāpāramitā* thought as well as so-called Mahāyāna Buddhism, one should not rely *only* on the Sanskrit version, the Tibetan translation, the more readable translation by Kumārajīva or the later Chinese translations, all of which show later qualitative and quantitative development, but rather follow Lokakṣema’s translation and the newly-discovered Gāndhārī manuscript fragments, which may retain more of the original shape of the text.

The recto of the Gāndhārī fragments of the *Aṣṭasāhasrikā Prajñāpāramitā* corresponds to the beginning part of the first *juan* (卷) of Lokakṣema’s translation (T. 8, no. 224, 425c4~426c10), while its verso, to the ending part of the second *juan* (436c17~438a7). Therefore, the original manuscript must have consisted of a huge scroll. Prof. Falk has published transliterations of the fragments together with my English translation of the parallel parts in Lokakṣema’s translation (Falk/Karashima 2012, 2013). In general, the Gāndhārī version is simpler than Lokakṣema’s translation, though in some cases, the opposite is evident. Although the two versions are thus not identical, their similarity is astonishing. For example, both lack the following phrase *prakṛtiś cittasya prabhāsvarā* (“the original nature of thought is luminous”; AS.3.18 = R.5.14 = AAA.38.23), which denotes a very significant concept i.e., *prakṛti-prabhāsva-citta* 自性清淨心 “the innately luminous (pure) mind”, while all the other Chinese and Tibetan translations have it³.

² “Li-yung “fan-pan” yen-chiu chung-ku han-yü yen-pien : i *Tao-hsing Pan-jo Ching* “i-i” yü *Chiu-se-lu Ching wei li*” 利用「翻版」研究中古漢語演變：以《道行般若經》「異譯」與《九色鹿經》為例 [A Study of the Evolution of Middle Chinese Using “Modified Versions”: Case Studies of the *Tao-hsing Pan-jo Ching* and Its Later Modifications and the *Chiu-se-lu Ching*], in: Chung-cheng Ta-hsüeh Chung-wen Hsüeh-shu Nien-k’an 中正大學中文學術年刊, no. 18 (2011): 165~188; “Shoki kan-yaku butten no gengo no kenkyū — Shirukasen yaku to Shiken yaku no taihiwo chūshin toshite” 初期漢訳仏典の言語の研究—支婁迦讖訳と支謙訳の対比を中心として— [A Study of the Language of the Early Chinese Buddhist Translations: Comparison between the translations by Lokakṣema and those by Zhi Qian], in: *Okuda Seiō Sensei Shōju Kinen Indogaku Bukkyōgaku Ronjū* 奥田聖應先生頌寿記念 インド学仏教学論集: Tokyo: Kōsei Shuppansha 佼成出版社 (forthcoming).

³ Krsh 2011: 4, n. 25; Falk/Karashima 2012: 34~35, n. 15.

(2) The original language of Lokakṣema's translation was probably Gāndhārī

A *Dictionary of Gāndhārī* (http://gandhari.org/a_dictionary.php) edited by Stefan Baums and Andrew Glass, has made it significantly easier to search for information on Gāndhārī words and documents. With the above-mentioned discoveries of Gāndhārī Mahāyāna texts, the Gāndhārī vocabulary of Mahāyāna Buddhism has increased dramatically. By analysing the transliterations found in Lokakṣema's translation of the *Aṣṭasāhasrikā Prajñāpāramitā* (hereafter "AS(Lk)") by means of these new tools and materials, it is evident that its original language was Gāndhārī (hereafter "Gā").

(1) *-th-* > *-s-*

The phonetic development *-th-* > *-dh-* > *-s-* is peculiar to Gāndhārī. The transliteration 怛薩阿竭 (429a27, 429c14 etc.; cf. Krsh 2010: 98; EH. tat sat ṛa gjiat; **tasa-agad(a)*), which occurs around 200 times in AS(Lk), corresponds to Gā. *tasagada*⁴ (< BHS. *tathāgata*). It is interesting that this Chinese transliteration demonstrates that the word *tathāgata* was understood not as *tathā-gata* ("one who has thus gone") but rather as **tathā-āgata* ("one who has thus come"), which agrees with the later standard Chinese rendering *rulai* 如來 ("one who has thus come").

(2) *-dh-* > *-s-*

The transliteration 末須(←願)提提 (471c11; cf. Krsh 2010: 329) may have been based on the Gāndhārī form *masu-ga<ṃ>dhi* (< BHS. *madhu-gandhika* < *mṛdu-gandhika*⁵; cf. Gā. *masu* < Skt. *madhu*). The words *bodhi* and *bodhisat(t)va* become *bosi* and *bosisatva* in Gāndhārī and from their transliterations 佛 (438a2, 460c26 etc.; cf. Krsh 2010: 164f.) and 菩薩 (425c8, -10 etc.; cf. Krsh 2010: 351) in AS(Lk), we cannot say for sure what their original forms were.

(3) *-bh-* > *-h-*

The transliterations 首呵 (435a12; EH. śju: ha; **Śuha* < *Śubhā*; Krsh 2010: 454), 波栗多修呵 (435a13; EH. pa ljiət ta sju he; **Parittaśuha* < *Parittaśubha*; Krsh 2010: 45f.), 首訶迦 (439c25; EH. śju: ha kja[kra]; **Śuhaka-* < *Śubhakṛtsna*; Krsh 2010: 453) and 阿波摩首訶 (439c24; EH. ṛa pa ma śju: ha; **Apama(ṇa)śuha* < *Apramāṇaśubha*; Krsh 2010: 1) indicate that the underlying Indian text read *śuha*, which is actually found in the Gāndhārī *Dharmapada*⁶, instead of *śubha*. Therefore, this shows that the development *-bh-* > *-h-*, common in Middle Indic, including Gāndhārī⁷, occurred in the underlying text.

From the transliteration 須菩提 (425c5 etc.; EH. sju bo dei; Skt. *Subhūti*; Krsh 2010: 554), which occurs more than 600 times, one may assume its underlying form to be *Subhuti* or **Subhudi*, while, in the Gāndhārī fragments of the same text, both *Suhuti* and *Subhuti* are found⁸.

(4) *-h-* > \emptyset

One of the characteristics of Gāndhārī is that the *h* in the medial position, is

⁴ Ajitaseṇa Inscription: 3–4; British Library Fragment 7: a Da1 = Baums 2009: 241; Nasim Khan 73.18f., 77.3f., 81.10 etc.

⁵ Cf. Krsh 2010: 329, ns. 181 and 182.

⁶ DhP-G^k: 19b, 217a, 241b.

⁷ Cf. Karashima 1994: 24, § 2.4.6.i.

⁸ Falk/Karashima 2012: 28(1-02), 30(1-05) etc. *Suhuti*; 30(1-04), 32(1-10) etc. *Subhuti*.

sometimes elided, or is treated merely as a glide consonant and replaced by another glide consonant⁹. The following transliterations from AS(Lk) indicate that in its underlying Indic text, *h* was either elided or became a mute character: 會波羅 (467b9; EH. γ wat- pa la; **Ve'a(p)phala* < *Vehapphala* [= Pā] < BHS. *Vṛhatphala* / *Bṛhatphala*; Krsh 2010: 234), 梵摩三鉢 (431a27; EH. b(r)jam- ma sēm pat; *Brama Sa'ampati* < Gā. *Brama Sahampati*¹⁰ < BHS. *Brahmā Sahāmpati*; Krsh 2010: 159), 僧那 (443a24; EH. sōng na; **sa(m)ṇa'a* < **sa(m)ṇaha* < Skt. *saṃnāha*; Krsh 2010: 405), 摩訶僧那僧涅 (427b29, 427c2 etc.; EH. ma ha sōng na sōng niət; **mahasa(m)ṇa'a-saṃnaddha* < Gā. **mahasa(m)ṇaha-saṃnaddha* < BHS. *mahāsaṃnāha-saṃnaddha*; Krsh 2010: 323).

(5) *-bh-* > *-h-* or \emptyset

The following transliterations indicate that in the underlying text, the intervocalic *-bh-* had already developed into *-h-* which was, in turn, either elided or became a mute character: 阿波摩那 (467b9; EH. γ a pa ma na; **Ap(r)amaṇa'a* / **Ap(r)amaṇaha* < *Apramāṇābha*; Krsh 2010: 1), 阿波摩修 (435a13; EH. γ a pa ma sju; **Ap(r)amaṇaśu'a* / **Ap(r)amaṇaśuha* < *Apramāṇaśubha*; Krsh 2010: 1-2), 阿會亘修 (431a16, 435a12 etc.; EH. γ a γ wat- sjwan sju; **Avasvara śu'a* / **Avasvara śuha* < BHS. *Ābhāsvara* + *śubha*?; Krsh 2010: 2-3), 波利陀 (435a11, 439c23; EH. pa ljiəi- da; **Paritta'a* / **Parittaha* < *Parītābha*; Krsh 2010: 45), 瘡(v.l. 廬)波摩那 (435a12, 439c23; EH. γ ap pa ma na; **Ap(r)amaṇa'a* / **Apramaṇaha* < BHS. *Apramāṇābha*; Krsh 2010: 143), 修乾 (435a13; EH. sju gjian[kan]; **Su'akiṇṇ(a)* / **Suhakiṇṇa* < *Śubhakṛtsna*; cf. Pā. *Subhakiṇṇa*, **kiṇṇa*; Krsh 2010: 552). The transliteration 阿彌陀 (EH. γ a mjiei[mjiei:] da; *Amida'a* / **Amidaha* < *Amitābha*) for the well-known Mahāyāna Buddha, which Lokakṣema used in his Chinese translation of the Larger *Sukhāvativyūha*, namely the *Da Amituo jing* 大阿彌陀經 (T.12, no. 362), is also an example of this development.

(6) *-p-* > *-v-*

The transliterations 優婆塞 (431a15, 451a13 etc.; EH. γ ju ba sək; Gā. **uvasak(a)* < BHS. *upāsaka*; Krsh 2010: 595), 優婆夷 (431a15, 451a13 etc.; EH. γ ju ba źjiəi; Gā. *uvasia* < BHS. *upāsikā*; Krsh 2010: 595) indicate that in the underlying Indic text had *-v-* for OIA *-p-*. Actually, in the above-mentioned Bajaur fragments, similar forms *uvaśea* (< BHS. *upāsaka*), *uvaśia* (< BHS. *upāsikā*) occur (Nasim Khan 110.9¹¹). Also, the Chinese characters 愁 (EH. γ wa), 和 (EH. γ wa), 洹 (EH. γ wan), 曰 (EH. γ jwat), 越 (EH. γ jwat) in the following transliterations, show that the same development *-p-* > *-v-* were a feature of the original language of the Indic text upon which the Chinese translation was based: 漚愁拘舍羅 (433c7 etc.; EH. γ ou γ wa kou[kjou] śja- la; **uvaakośalla*¹² < BHS. *upāyakauśalya* or *upāyakauśala*; Krsh 2010: 346f.), 波耶和提 (431a1; EH. pa źja[zja] γ wa dei; **Pajavadi*, **Prajapati* < BHS. *Prajāpati*; Krsh 2010: 48), 和夷羅洹 (455b28; EH. γ wa źjiəi la γ wan; **Vajiravāṇi*, *Vayiravāṇi*¹³ < BHS. *Vajrapāṇi*; Krsh 2010: 212), 提和竭羅 (431a7; EH. dei

⁹ Cf. Brough 1962: § 39; Karashima 1994: 28, § 2.8; von Hinüber 2001: § 223; Allon 2001: 102; Salomon 2008: 128.

¹⁰ Senavarman Inscription: Salomon 1995: 10: *Brahma Saha[m]pati* = von Hinüber 2003: 34. *Bramo Sahampati*.

¹¹ *uvaśiana* is a misprint of *uvaśiaṇa*.

¹² Cf. Gā. *kośala* < *kauśalya* (Baums 2009: 636~637).

¹³ Cf. Gā. *vayira-* (Senavarman Inscription: 5; Mount Banj Inscription: 3–2).

γwa gjiat la; **Diva(m)gara* < BHS. *Dīpaṃkara*; Krsh 2010: 478f.), 摩訶惟曰羅 (468c12; EH. ma ha źjwəi γjwat la; **Maha-vevula*¹⁴ < **Mahā-vevulla* < BHS. *Mahā-vaipulya*; Krsh 2010: 324), 三昧越 (455b14f.; EH. səm mət- γjwat; **samavaj(adi)*¹⁵ < Skt. *samāpadyate*; Krsh 2010: 400-401).

(7) *-t- > -d-*

The Chinese characters 陀 (EH. da), 檀 (EH. dan) in the following transliterations, indicate that the development *-t- > -d-* was a feature of the language of the original Indic text: 阿陀波 (435a15; EH. ʔa da pa; **Adapa* < BHS. *Atapa*; Krsh 2010: 11), 阿比耶陀 (439c25; EH. ʔa bjiəi[bjiəi-] źja[źja] da; **Aviyada(va)?* < **Aviha Adava* < Pā. *Avihā Atapā* > BHS. *Avrhāh Atapāh*; Krsh 2010: 1), 兜術陀 (EH. tou źjwət da; 435a4, 468b-3; Gā. *Tuṣida*¹⁶ < BHS. *Tuṣita*; Krsh 2010: 129f.), 沙羅伊檀 (470a21; EH. sra la ʔjiəi dan; **ṣal-ayadaṇ(aṇi)* < BHS. *ṣaḍ-āyatanāni*; Krsh 2010: 405).

(8) *-d- > -l-, -ḍ- > -l-*

The following transliteration shows the development of *-d- > -l-*: 拘文羅 (471c10; EH. kou[kjou] mjən la; Gā. *kumula*¹⁷ < Skt. *kumuda*; Krsh 2010: 281f.). The following suggests the changes of *ratna > MI. ratana > Gā. radaṇa*¹⁸ > **ralamna*¹⁹: 羅蘭(←麟)那枝頭 (461c1, 9; EH. la lan[麟 ljiən] na kieʔ/tśjei dou; **Ralamnakedu?* < *Radaṇa*^o < *Ratana*^o < BHS. *Ratnaketu*; Krsh 2010: 315f.). Also, the following transliteration indicates the development of *-ḍ- > -l-*: 沙羅伊檀 (470a21; EH. sra la ʔjiəi dan; **ṣal-ayadaṇ(aṇi)* < BHS. *ṣaḍ-āyatanāni*; Krsh 2010: 405).

(9) *jñ > (ṃ)ñ*

In Gāndhārī, like other Middle Indic languages, *jñ* becomes *(ṃ)ñ*. The transliterations in AS(Lk) also indicate the same development: 般若波羅蜜 (425c8 etc.; EH. pan nja: pa la mjiət; Gā. *prañāparamida*²⁰ < BHS. *prañāpāramitā*; cf. Krsh 2010: 23), 般遮旬 (433b29, c2 etc.; EH. pan tśja zjwən; Gā. **pa(ṃ)cavi(ṃ)ñ(a)*²¹ < BHS. *pañcābhijñā*; Krsh 2010: 23f.), 尼惟先 (465a7; EH. nrjiəi[niəi-] źjwəi siən; **Nevasaña*²² < BHS. *Naivasamjñā(nāsamjñāyatana)*; Krsh 2010: 336), 薩芸若 (426a24 etc.; EH. sat γjwən nja:; Gā. *sarvaña*²³ < Skt. *sarvajñā*; Krsh 2010: 395-396). Thus, the Chinese word 般若 (EH. pan nja:), though pronounced in various ways such as *bo re*, *ban ruo* or *ban re*, should be

¹⁴ Cf. Gā. *vehula* (< *veulla* < *vevulla* < *vaipulya*) (Nasim Khan 81.12); Gā. *vivula* (CKI 249: 4; Dhp-G^k: r 164) < Skt. *vipula*.

¹⁵ Cf. Gā. *pradivajadi* (EĀ-G: r 43, 46, 49, 56, 59) < *pratipadyate*; Gā. *uvavajadi* (Dhp-G^k: r 232f.) < Skt. *upapadyate*.

¹⁶ Cf. Nasim Khan 73.38. *Tuṣidaṇa*.

¹⁷ Cf. Dhp-G^k: r 145d.

¹⁸ Cf. Nasim Khan 77.8, 83.55 etc.

¹⁹ In an old, anonymous Chinese translation of the *Devadatta*-chapter of the Lotus Sutra (T. 9, no. 265, translated in the Western Jin Period [265-316 C.E.]), we find a transliteration 抱休羅蘭 (EH. bau hju la lan; 197a12), paralleling Skt. *Prabhūtaratna* (> **Prahūtaratana* > **Prahūtaradana* > **Pahū(la)ralan(a)?*), in which 休(EH. hyu) indicates that the Middle Indic development *-bh- > -h-* had already occurred in the underlying text.

²⁰ Falk/Karashima 2012: 28(1-03), 32(1-13), 34(1-14, 16) etc.

²¹ Cf. Gā. *aviña*~ (Senior Fragment 19: v 30) < *abhijñā*; Gā. *ṣaḍa[vi]ñā* (British Library Fragment 9: v 156 [Baums 2009: 255]) < *ṣaḍ-abhijñāh*.

²² Cf. Gā. *saña* (British Library Fragment 1: r 32d; Senior Fragment 5: r 17, 21, v 26; Baums 2009: 678f. *saña*-; Nasim Khan 75.18, 79.23, 81.1f., Nasim Khan 81.14f., 83.38f. etc.) < *sañjñā*; Pā. *Nevasaññā(nāsaññāyatana)*.

²³ Gā. *sarvaña*- (CKD 399: Obv 2; CKD 272: Obv 3; CKD 358: Obv 3; CKI 241: 7, 10); Gā. *sarvañū* (EĀ-G: r 3d); cf. Pā *sabbaññū*.

assume that while the Bactrian form **Μετραγα* (**Metraga*) was sanskritised to *Maitraka* on the one hand, it was Gāndhārised to *Metreya*, *Metrea* on the other. From these Gāndhārī forms, BHS. *Maitreya*, Pā. *Metteya* were coined, though it is unlikely that they were the original forms. As I pointed out several years ago³³, there is a description of *Metteya* receiving the prediction of Buddhahood from the Buddha in the *Cakkavatti-Sīhananda-suttanta* of the *Dīgha-nikāya* (No. 26, III 75f.) and in the Chinese translation of the same text, namely the *Zhuanlunshengwang xiuxing jing* 轉輪聖王修行經 of the *Dīrghāgāma* of the *Dharmaguptaka* school (T. 1, no. 1, 41c29f.), while their parallel text, namely the *Zhuanlunshengwang jing* 轉輪聖王經 in the Chinese translation of the *Madhayamāgama* of an unknown school (T.1, no. 26, 520b~525a) lacks this description, which is apparently truer to the original. Throughout the Pāli *Nikāyas*, the name *Metteya* occurs only once and therefore, it is unlikely that faith in *Metteya* / *Maitreya* existed in early Buddhism. I assume that such faith, which occurred first in northwest India, was interpolated into this particular scripture long after the formation of the canon³⁴. The original meaning of *Μετραγα* or *Metreya* is unknown, while its relationship with the Vedic *Mitra* and Avestan *Mithra* has not been clarified as of yet. It is possible that a god or hero, who had been worshipped in the Gandhāra region was at some point introduced into Buddhism.

(14) 耆闍崛 = **G(r)ija-guda*

From the transliteration 耆闍崛 (425c4 etc.; EH. gjiəi dźja gjwət; cf. Krsh 2010: 356), we may be able to reconstruct an original form like **G(r)ija-guda*, which resembles Gā. *Grija-uda*³⁵ in the AS(Gā) and Pā. *Gijjhakūṭa*, while differing from BHS. *Ḡḍhrakūṭa*.

(15) 泥犁 = *nirea*

The transliteration 泥犁 (440b14 etc.; EH. niəi liəi[ljiəi]; cf. Krsh 2010: 337f.) is closer to Gā. *nirea*³⁶ than to Skt. *niraya* (“hell”).

(16) 塔 = *thuva*

The character 塔 (435b11; EH. thəp; cf. Krsh 2010: 475f.) was invented specially to transliterate Gā. *thuba*³⁷ or Gā. *thuva*³⁸ (< Skt. *stūpa*).

(17) 三耶三菩, 三耶三佛 = **samya-bosi*, **samya-budha*

The transliterations 阿耨多羅三耶三佛 (432a13; EH. ʔa nou ta la səm źja[zja] səm bjət; cf. Krsh 2010: 8), 阿耨多羅三耶三菩 (437b24 etc.; EH. ʔa nou ta la səm źja[zja] səm bo; cf. Krsh 2010: 8-9) and 三耶三佛 (429a28 etc.; EH. səm źja[zja] səm bjət; cf. Krsh 2010: 403) parallel Skt. *anuttara~ samyaksambodhi~*, *samyaksambuddha~*, while their Gāndhārī equivalents are Gā. *aṇutara~ sa(m)masa(m)bosi~*³⁹, *aṇutara~ saṃmasa(m)bosi~*⁴⁰, *sa(m)masabudha~*⁴¹, *sa(m)mesa(m)budha*⁴². The Chinese 三耶 (EH. səm źja[zja]) in the

³³ *Gendaigoyaku: Agon-Kyōten, Jō-agonkyō* 現代語訳『阿含經典・長阿含經』[An Annotated Japanese Translation of the Chinese Version of the *Dīrghāgāma*], vol. 2, Tokyo: Hirakawa Shuppan, 310~311, n. 121.

⁴¹ CKI 176: D2; CKI 334: 4; CKI 564: 3-4.; Nasim Khan 50.20, 52.27, 73.13, 73.18, 73.24 etc.

above-quoted transliterations, indicates that its original form was Gā. *samya*-⁴³, *saṃya*-⁴⁴ (< Skt. *samyak*) rather than Gā. *sa(m)ma*-, *sa(m)me*-.

(18) 曇無竭 = Gā. *Dha<ṃ>mogada

The transliteration 曇無竭 (471c23 etc.; EH. dam mjo gjiat; cf. Krsh 2010: 477) suggests that its original form was not Sanskrit but Gāndhārī, such as Gā. *Dha<ṃ>mogada (< BHS. *Dharmodgata*), which is not attested anywhere.

(19) 阿僧祇, 般泥曰, 釋迦文, 釋提桓因, 伊沙

The following various transliterations seem to have been based on Gāndhārī forms: 阿僧祇 (427c5 etc.; EH. ʔa səng gjiei; Gā. *asa(m)khea*⁴⁵ < Skt. *asamkhyeya*; cf. Krsh 2010: 10), 般泥曰 (438b25; EH. pan niəi ʔjwat; Gā. *pariṇivuda*⁴⁶ < BHS. *parinirvṛta*; cf. Krsh 2010: 22), 釋迦文 (431a10 etc.; EH. śjiak kja mjən; Gā. *Śakamuṇi*⁴⁷ < *Śākyamuni*; cf. Krsh 2010: 447f.), 釋提桓因 (429a11; EH. śjiak dei ʔwan ʔjiən; Gā. *Śakra~ devaṇa imtra*⁴⁸; Gā. *Śakra~ devana i(m)dra*⁴⁹; Gā. *Śakra de[va]ṇa i(m)dra*⁵⁰; Gā. *Śakra~ devaṇi(m)dra*⁵¹ < Skt. *Śakra devānām indra*; cf. Krsh 2010: 448), 伊沙 (431a2; EH. ʔjiəi sra; Gā. *iṣi*⁵² < Skt. *ṛṣi*; cf. Krsh 2010: 566).

(20) 斯陀含 = Gā. *saiḍagami*, 須陀洹 = Gā. *sodavaṇa*

The transliterations 斯陀含 (429b8 etc.; EH. sjei da gəm; cf. Krsh 2010: 459f.) and 須陀洹 (429b8 etc.; EH. sjou da ʔwan; cf. Krsh 2010: 555) correspond well with Gā. *saiḍagami*⁵³ (< BHS. *sakṛdāgāmin*) and Gā. *sodavaṇa*⁵⁴ (< BHS. *srotaāpanna*) respectively. However, they occur also in the *Qichusanguan jing* 七處三觀經 (T. 2, no.150A, 877a11~12) and in the Kongōji (金剛寺) Manuscript of the *Anbanshouyi jing* 安般守意經, both of which are attributed to An Shigao 安世高 (fl. 148-168 C.E.).

From the above-quoted transliterations, we may assume that the underlying language of Lokakṣema's translation of the *Aṣṭasāhasrikā Prajñāpāramitā* was Gāndhārī or at least contained Gāndhārī elements⁵⁵.

⁵⁵ The following words in Lokakṣema's translation of the *Aṣṭasāhasrikā Prajñāpāramitā* demonstrate that he understood their original words through his knowledge of Middle Indic. Thus, 所語如甘露 (431b29; "the speech is like ambrosia"), corresponding to AS.27.7 = R.53.14 = AAA.197.16. *mṛdu-vacana*~ ... *mita-vacana*~ ("the speech ... will become ... soft, measured") indicate that he confused *mṛdu* ("soft") or *mita* ("measured") with *amṛta* ("ambrosia"; MI. **amita*, Gā. **amṛda*, **amrida*); cf. Krsh 2011: 62, n. 69.

Also, 薩芸若 (457c29; EH. sat ʔjwən nja.; a set transliteration of *sarvajña* "omniscient, all-

(3) Was the *Prajñāpāramitā* scripture composed in the Gandhāra region?

In the various versions of the *Aṣṭasāhasrikā Prajñāpāramitā*, there is a prophecy of the Buddha's foretelling the spreading of this scripture after his passing away⁵⁶. Lokakṣema's translation says that this sūtra will first appear in southern India, then spread through western India, finally reaching northern India (北天竺) (T. 8, no. 224, 446a28f.; Krsh 2011: 225f.). The translations by Kumārajīva (T. 8, no. 227, 555a27f.) and Shihu (T. 8, no. 228, 623b2f.) depict the same route, namely from the south through the west and finally to the north. The older version of the two translations by Xuanzang (T. 7, no. 220, 889c26f.) describes the route as directly from the south to the north, though the newer version (T. 7, no. 220, 808b21f.) relates the route as from the southeast → south → southwest → northwest → north → northeast. However, the Sanskrit and Tibetan versions specify that "these sūtras associated with the six perfections will, after the passing away of the Tathāgata, appear in the south (*Dakṣiṇāpatha*). From the south, they will spread to the eastern country (*Vartani*). From the eastern country, they will spread to the north (*Uttarāpatha*) when the Dharma and Vinaya have just reached their peak and the good Dharma (begins to) disappear". Finally, Zhi Qian's translation states that this scripture will appear in the country of Śākyan (釋氏國), then spread to the countries in *Vartani* (會多尼) and then to those in *Uttarakuru* (鬱單曰) (T. 8, no. 225, 490a24f.). Except for this last one, the other versions agree that this scripture will appear first in southern India and finally reach northern India, though via different routes.

Just after the above-stated descriptions, in all the versions, the Buddha says "In northern India, there will be very many *bodhisattvas*. However, there will be only a few among them who will study the *Prajñāpāramitā*"⁵⁷.

These descriptions apparently suggest that the text of the *Aṣṭasāhasrikā Prajñāpāramitā* took shape in northern India, though we can never exclude the possibility that the basis of *Prajñāpāramitā* thought was formed in southern India, such as in the Andhra region where the *Mahāsāṃghika* school, with which this scripture is closely related, predominated, as is often maintained. However, it is evident from the above-stated descriptions that the text itself was composed in *Uttarāpatha* (in Chinese 北天竺 "northern India") which commonly designates the "Northern Region", "encompassing territories

knowing") in the following sentence 菩薩至無水漿中時，心不畏怖。自念言：“……願我後得阿惟三佛時，使我剎中皆有水漿，令我剎中人悉得薩芸若八味水。” corresponds to AS.179.21 = R.363.5 = AAA.741.6. *tathā ca sarvasattvān puṇyairiḥ samniyokṣye yathā 'ṣṭāṅgopetapāṅtyalābhino 'mī bhaviṣyanti*. Lokakṣema seems to have confused Skt. *puṇya* (MI. *puñña*; "merit") with MI. *pañña* (< Skt. *prajñā* "wisdom"); cf. Krsh 2011: 337, n. 327.

Moreover, Lokakṣema transliterated Skt. *jana* ("people") sporadically as 禪 (EH. džjan; cf. Krsh 2010: 57~59, s.vv. 禪, 禪法), which he used to render MI. *jhāna*, Skt. *dhyāna* ("meditation") as well, namely 悉逮得禪 (428c7~8, 10; "one, who has attained all the *jhānas*") and 逮得禪者 (454b-13; "one, who has attained *jhāna*") correspond to AS.15.3, 7, 161.5 = R.29.18f., 20, 323.7 = AAA.120.2f., 10, 666.3. *prthagjana*~ ("the common people") (cf. Krsh 2011: 33, n. 266; *ibid.*, 304, n. 7), while 悉逮得禪法 (428c11; "one, who has attained *jhāna*-Dharma completely") corresponds to AS.15.7 = R.29.22 = AAA.120.15. *prthagjana-dharma*~ ("the dharmas which constitute the common people") (cf. Krsh 2011: 33f., n. 269). Presumably, this fact reflects that in the underlying language as with Gāndhārī, both Skt. *jana* ("people") and MI. *jhāna* had merged as *jaṇa*, *jaṇa*.

⁵⁶ Cf. Krsh 2011: 225f., n. 289.

⁵⁷ AS.112.16 = R.226.7 = AAA.489.3; cf. Krsh 2011: 226f.

from the Gangetic basin in northern India to Mathura, Taxila, and Bactria in northern Afghanistan and western Central Asia”⁵⁸. I assume that, in the above-quoted prophecy by the Buddha, *Uttarāpatha* is none other than the Gandhāra region. As we shall see later, in the story of *Sadāprarudita*, which constitutes the ending part of this scripture, the Bodhisattva *Dharmodgata* is said to live in a palace, where a jewelled box containing the *Prajñāpāramitā*, written with "melted" lapis lazuli (*vilīna vaiḍūrya*) on golden tablets, is placed and to preach this perfection of wisdom in the country of *Gandhāvātī*, whose name seems to hint at Gandhāra.

If this sūtra was really composed in the Gandhāra region, it is quite probable that its language was Gāndhārī, as the newly-discovered Gāndhārī fragments and Lokakṣema’s translation, dating back to the first and second centuries, suggest. On the other hand, there are also fragments of a Sanskrit manuscript of the same scripture, discovered in Bāmiyān and now preserved in the Schøyen Collection and elsewhere, which are written in an old Brāhmī script of the Kuṣāṇa Period and are supposed to date back to the second half of the third century C.E. based on palaeographical evidence (Sander 2000b: 288). Dr. Sander, who has studied this manuscript, states (2000a: 3f.) that it shows traces of a Middle Indic language, e.g., *tat kisya heto; kho, khu* (< Skt. *khalu*); *āvusa; thera, arahatā, unminyata-niminyitāni* (< BHS. *unmiñjita-nimiñjitāni*), *bhoti* (< Skt. *bhavati*) etc. In spite of its antiquity, it is remarkably close to the Sanskrit edition based on the manuscripts from Nepal, dating from the eleventh century onwards. Therefore, one may assume that, at an early stage of the transmission of this scripture, it branched into two, i.e., the older versions — namely the Gāndhārī fragments, the Chinese translations by Lokakṣema, Zhi Qian, Zhu Fonian, Kumārajīva, and a translation by Xuanzang⁵⁹ — and the newer ones — namely the Sanskrit manuscript fragments of the Kuṣāṇa Period, the other translation by Xuanzang, Shihu’s translation, the Sanskrit version and the Tibetan translation⁶⁰.

(4) The story of *Sadāprarudita* and the origin of Buddha-images

The final part of the *Aṣṭasāhasrikā Prajñāpāramitā* is the story of Bodhisattva *Sadāprarudita* and his quest for the Dharma. When he was lamenting over his misfortune of being born in a time when there was no *buddha*, a voice from the sky told him “Go East, there you will hear the *Prajñāpāramitā*!” He journeyed in that direction, not knowing how far he should go. Then a *buddha*-figure (*tathāgata-vigraha*; 化佛) appeared and told him to go five hundred *yojana* further to a country called *Gandhāvātī* and to listen to the teaching on the *Prajñāpāramitā* being given by the Bodhisattva *Dharmodgata*. Following these instructions, he went to *Gandhāvātī* and worshipped the *Prajñāpāramitā*, written with melted lapis lazuli on golden tablets and placed in a jewelled box in a storeyed pavilion which the Bodhisattva *Dharmodgata* had made built for the worship of this scripture. Having worshipped there, *Sadāprarudita* went to where *Dharmodgata* was preaching and listened.

⁵⁸ Cf. Neelis 2011: 186.

⁵⁹ Underlying Indian texts of the Chinese translations by Kumārajīva and Xuanzang were written probably in Sanskrit.

⁶⁰ Cf. Krsh 2011: xii~xiii.

He then entered into a good many meditations one after another — only the oldest Chinese translations by Lokakṣema and Zhi Qian tell us at the end of the story that infinite numbers of *buddhas* in the ten directions bestowed a prophecy on *Sadāprarudita* of his becoming a *buddha*⁶¹. This story was adapted in Kang Senghui's *Liuduji jing* 六度集經 (Collection of Stories concerning the Six *Pāramitās*), under the title *Changbei pusa bensheng* 常悲菩薩本生 (the previous life of Constantly-Lamenting Bodhisattva) (T.3, no.152, 43a13f.).

The story of Bodhisattva *Sadāprarudita*, found in the Chinese translations by Lokakṣema and Zhi Qian, is of great detail as compared with later versions — unfortunately Gāndhārī fragments of this portion have not been discovered to date. Also, the themes of the story found in the oldest Chinese translations and the later versions seem to differ. The following passages (476b17f.; Krsh 2011: 525f.), which are often referred to as being the first to mention Buddha-images⁶², also furnish us with a clue about when and where this *Prajñāpāramitā* text was composed.

The Bodhisattva *Dharmodgata* said: “... For instance, after the Buddha enters *parinirvāṇa*, somebody makes an image of the Buddha. People, who see the Buddha-image, all kneel and worship it. The image is neat and beautiful and resembles the Buddha perfectly. Everybody who sees it admires it and offers flowers, incense, and variegated silk fabric to it. Do you think, O wise man, that the god Buddha (or “the deity Buddha” 佛神⁶³) is inside the image?”

Bodhisattva *Sadāprarudita* replied: ‘No, he is not inside. The reason for creating a Buddha-image is just in order to make people obtain the merit (from worshipping it). A Buddha-image is not made on one condition; a Buddha-image is not made on two conditions. (There are three necessary conditions, namely) there is gold; there is a clever person; and somebody who saw the Buddha in his lifetime. Because he thinks of the Buddha after his *parinirvāṇa*, he makes a Buddha-image and wishes to make people in the world worship it and obtain the merit (from worshipping it)’.

Bodhisattva *Sadāprarudita* (further) replied to the master: “Because the Buddha has already entered *parinirvāṇa*, one makes a (Buddha-)image”.⁶⁴

Yūichi Kajiyama has assumed that this portion, which is wanting in the later versions, was composed by Lokakṣema⁶⁵, but I do not agree with this assumption. Presumably, the

⁶¹ Cf. Krsh 2011: 531 and n. 190.

⁶² E.g., Lewis R. Lancaster, “An Early Mahayana Sermon about the Body of the Buddha and the Making of Images”, *Artibus Asiae* 36, no. 4 (1974): 287~291; Juhyung Rhi, “Images, Relics, and Jewels: The Assimilation of Images in the Buddhist Relic Cult of Gandhāra— or vice versa”, in: *Artibus Asiae* 65, no. 2 (2005), 204f.

⁶³ Cf. Krsh 2010: 172.

⁶⁴ “譬如佛般泥洹後，有人作佛形像。人見佛形像，無不跪拜供養者。其像端正姝好，如佛無有異。人見，莫不稱歎，莫不持華、香、繒綵供養者。賢者！呼佛神在像中耶？” 薩陀波倫菩薩報言：“不在中。所以作佛像者，但欲使人得其福耳。不用一事成佛像，亦不用二事成。有金，有點人，若有見佛時人。佛般泥洹後，念佛故，作像，欲使世間人供養得其福。” 薩陀波倫菩薩報師言：“用佛般泥洹後，作像耳。” Cf. the parallel passages in Zhi Qian's translation: T. 8, no. 225, 507a22f. “譬如佛滅度後，有人作佛形像，端正姝好，如佛無異。人見，莫不稱歎持花、香、繒綵供養者。賢者！謂佛神在其像中耶？” 對曰：“不也。所以作像者，但欲使人繫意敬自警脩，得其福耳。亦不用一事、二事成。有金，有智人，若有見佛時人。佛滅度後，念佛故，作像，欲使十方供養得其福。”

⁶⁵ Kajiyama 1976: 79.

composer(s) — he or they might have been a *dharmabhāṅaka* / *dharmabhāṅakas* — of the story of *Sadāprarudita* was (were) cynical about the worship of Buddha statues which, at that time, might have just started in Gāndhara. He (or they) must have been convinced that, in a time when there was no *buddha* in the world after Śākyamuni Buddha's *parinirvāṇa*, to worship the *Prajñāpāramitā* — i.e., to worship actual copies of the *Prajñāpāramitā* scripture —, which generates a *buddha*'s omniscience⁶⁶ and consequently all the *buddhas* themselves⁶⁷, was true worship of the Buddha which actualises meeting him and living in his presence⁶⁸, whereas worshipping a Buddha-image would not afford the same effect at all⁶⁹.

As this story of *Sadāprarudita* mentions the worship of the *Prajñāpāramitā*, “written” with melted lapis lazuli on golden tablets, it must have come into existence later than the other parts of this scripture. It might have taken more than fifty years for a *newly-*

⁶⁶ Cf. AS. 116.2 = R.234.10 = AAA.502.24f. *prajñāpāramitā āhārikā sarvajñā-jñānasya*; AS. 260.14 = R.527.19 = AAA. 989.23. *prajñāpāramitā bodhisattvānām mahāsattvānām sarvajñā-jñānasyāhārike* etc.

AsP.tr. 300 = AsP.tr.II 225).

⁶⁹ This attitude is quite similar to this scripture's opinion on *stūpa*-worship; Śakra, the king of the gods, asked the Buddha: “Suppose that there are two people. One of them would, having written down (*likhitvā*) the *Prajñāpāramitā* and made it into a manuscript (*pustakagatāṃ kṛtvā*), lay it (in a proper place), honour, revere, worship, and adore it with heavenly flowers, incense, and the like, while the other would place relics of the Tathāgata, who had entered *parinirvāṇa*, in *stūpas*; he would preserve them, keep them; he would honour, worship and adore them with heavenly flowers, incense, and so on. Which of the two, O Lord, would obtain the greater merit?” In answering this question, the Buddha replied: “... the Tathāgata is not named as such from the fact that he has acquired this physical body, but from the fact that he has acquired omniscience (*sarvajñatā*). And this omniscience of the Tathāgata has been generated (*nirjāta*) from the *Prajñāpāramitā*. ... Therefore, the person, who would, having written down the *Prajñāpāramitā* and made it into a manuscript, lay it (in a proper place) and honour it, would beget the greater merit. As by worshipping the *Prajñāpāramitā*, he worships the wisdom of the omniscient (*sarvajñā-jñāna*)”. (AS. 28.29~29.27 = R.57.5~59.5 = AAA.208.22~212.12; cf. AsP.tr. 105f. = AsP.tr.II 24f.) Thus, the composer of this scripture, by using the Buddha's mouth, placed absolute superiority of the worship of the *Prajñāpāramitā* scripture over that of *stūpa*-worship.

created text to become accepted as a *scripture* formulated by the Buddha. If that were the case, then it could be assumed that the original Indic text used by Lokakṣema for his translation of this scripture had appeared by the beginning of the second century at the latest, though more probably in the latter half of the first. This supposition may be supported by these newly-discovered Gāndhārī fragments, dating back to between 47~147 C.E., and this would also agree with the assumption that the appearance of Buddha statues in Gandhāra began to occur in the latter half of the first century. Realising that both making and worshipping Buddha statues were gaining popularity, the compiler of this scripture (or at least of the original texts of the oldest Chinese translations) regarded these new practices or this new movement cynically as merely expedient devices for meeting the Buddha and hence, obtaining the merit from worshipping a statue in a time when no *buddha* existed after Śākyamuni Buddha's passing away.

As is stated above, this portion is found only in the oldest Chinese translations by Lokakṣema and Zhi Qian — Zhu Fonian's translation lacks the last ten chapters and no Gāndhārī fragments of the latter part have been discovered as of yet — while it is wanting in the later versions. One may assume that, by the time of the compilations of the later versions, the practice of making statues of the Buddha and worshipping them had become so commonplace that the cynical point of view concerning such practices was felt to be anachronistic as well as irrelevant and consequently, this portion was simply deleted from the text.

In my opinion, one important theme in the oldest Chinese translations was to claim absolute superiority of the worship of the *Prajñāpāramitā* scripture over that of Buddha-images, which was thus deleted in later versions, resulting in the story's contents becoming more abstract and philosophical. This difference may reflect the transition in time, namely from the period when the practice of making statues of the Buddha arose to when it became commonplace to do so. It must be interesting and meaningful to compare and analyse the story of *Sadāprarudita* in different versions from such a historical point of view.
